Structural Engineer

Prestigious Structural Engineering firm servicing the entire Midwest region for over the last 4 decades is actively seeking talented and experienced Structural Engineering industry professional for our thriving Schiller Park, IL based office.

Since our conception over 40 years ago, our firm has grown to become one of the most well-regarded engineering firms in the Chicagoland Area and are known for our creativity, cost effective designs, and practical, workable solutions to design challenges. As a result our clients include residential and commercial developers, local and national corporations, public and private primary schools, colleges and universities, medical and research institutions, architects, homeowners, and municipal, state and federal agencies.

As one of the Midwest regions top Structural Engineering Consulting firms and an industry specialist in structural engineering design. We have played a key role in the design of numerous landmark structures from both the private and public sectors in the Chicagoland area. We are a leader in utilizing new techniques and technology for new designs and or retrofits. The variety of our past, ongoing, and future projects include everything from Commercial, Healthcare, Educational, Governmental, Correctional, Retrofits projects. We provide a complete range of structural engineering services to a wide variety of clients including architects, contractors, developers, government agencies and owners. Our services include Structural Design, Historical Restorations, Evaluation/ Inspection of Existing Structures, Seismic Analysis, Plan Check/ Design Review, Project Management, CAD Drafting, Value Engineering, etc.

Ideal candidates for these long term and exciting career opportunities will have a minimum of a bachelor's degree in Structural Engineering, Civil Engineering or Architectural Engineering, and preferable the minimum number of years listed of professional structural industry work experience for position listed. All candidates must be proficient with AutoCAD and have the ability to aid in the production of structural design drawings, structural construction documents, and structural detailing. Must be able to multi-task and handle various projects while reporting directly to Structural Division Manager.

Job duties for this Structural engineer will include working closely with internal structural engineers in developing structural drawings and details; produce plan sheets from files or drawings provided by outside consultants (typically architects); produce complex drawings, base drawings, and illustrations.

In addition to a highly competitive salary qualified candidates will receive an excellent benefits plan.

Our firm is actively seeking highly motivated individuals to fill our expanding needs. Our most immediate openings include:

- Structural Intern
- Structural Engineer – Recent Graduate (0-2 yrs experience)
- Structural Engineer - Mid Career (2+ years of experience)
- Licensed S.E. – (5+ yrs experience)

If your experiences match the job descriptions please email your resume to hr@thestructuralshop.com . No phone calls please.

One of our exciting opportunities may be right for you--now or in the future.
